

Ecological Water and Sanitation

Posted by wasifbashir15 - 14 Nov 2012 11:10

Dear Sir/Mam

Hope all the best.

I am student of Sustainable water ,sanitation,Health and Development at Comsat University Abbottabad Campus Pakistan.

I want to ask a Question to all WASH Specialist that

did it possible to develop the Ecological Sustainable sanitation system in Developing Countries Like Pakistan India Nepal and Bangladesh etc to establish the double Vacuum - toilets?.

is there a possibilities to attain the bio Gas ,Vacuum pressure for double Vacuum toilets and electricity to run this system?

if no then why? if yes then how ?

what would be the mechanism of this system ?*[i]***[b]**[u]

if any body have practiced on it or have knowledge about it

Please share your great information and knowledge with us to develop such as innovative system in developing countries.
