

three publications on the topic (by Stream Community Rehabilitation and Disability Studies, University of Calgary, Canada)

Posted by wolbring - 09 Jan 2013 02:16

Hi everybody,

I am new to this group. I am an Associate Professor within Community Health Sciences, Stream Community Rehabilitation and Disability Studies, University of Calgary, Canada.

Among others I cover climate change, energy and water and sanitation issues related to disabled people and I analyse climate change, energy and water and sanitation discourses through an ableism lens.

May be all known stuff for this group? If yes I apologize.

Hi Gregor,

This is Mwaniki in Nairobi, Kenya. We publish a free magazine viz. the **'Africa Water, Sanitation & Hygiene'** and after going through your paper ' **The Economic and Social Benefits and the Barriers...**'

I found it to be very well researched, comprehensive and informative with discussion on Africa at the outset. Am sure your work (but must be abridged) will be of special interest to our audience as you may understand it's a big challenge to access sanitation and hygiene more so in the third world as it requires a lot of partnerships and consultative approach with partners and stakeholders.

Am kindly requesting you to contribute the abridged version of this particular paper for our readers in the oncoming edition that is the Jan-Feb 2013 issue on gratis. We will acknowledge the source and carry the byline.

Please find a short profile of the publication enclosed in the attachment.

Sincerely

Mwaniki
